

The Government of the Republic of Trinidad and Tobago
MINISTRY OF EDUCATION

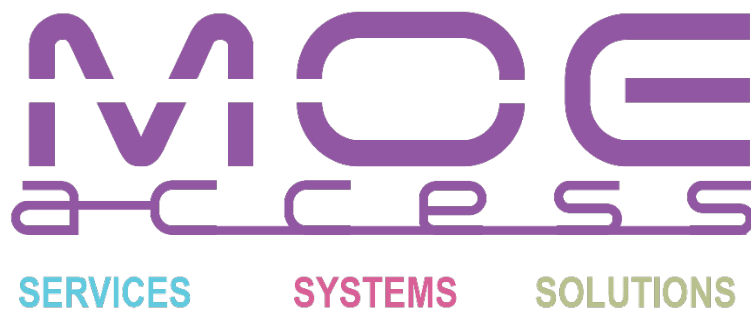

Official Launch
Digital Transformation Programme
Media Brief

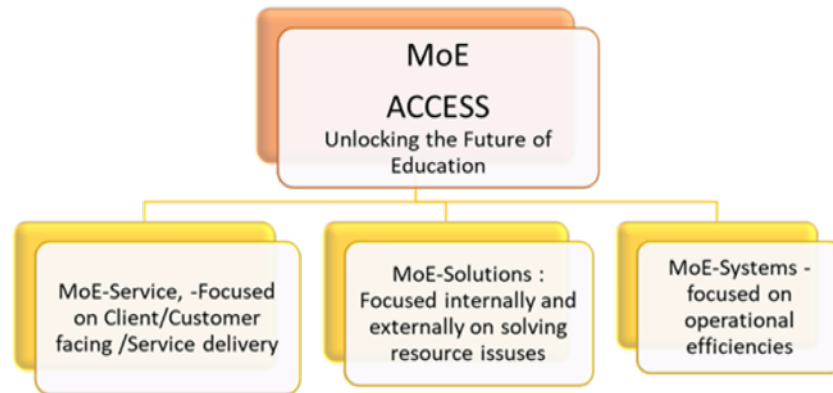

Unlocking the Future of Education

Digital transformation seeks to modernize existing processes and systems and integrate them into the digital world. This means using technology and digital platforms to improve access to and quality of education.

The Ministry of Education's significant advancement in its Digital Transformation thrust has produced brand new and exciting projects. The suite of eighteen (18) projects comprises the full programme that has been streamlined and branded **MOE ACCESS**, the theme of which is "Unlocking the Future of Education." **MOE ACCESS** is supported by the three pillars of **Services, Systems, and Solutions** which characterize the project's intent and benefit. The intent is to create an ecosystem where each element supports the other and works concurrently in each phase of the programme's roll out.

Official MOE ACCESS Logo

The suite of Digital Transformation Projects are:

*Under Development

The Digital Transformation Programme of the Ministry of Education focuses on the achievement of five (5) critical objectives:

1. To support the embedding of digital technologies in teaching, learning and assessment
2. To upgrade digital technology infrastructure in all Schools
3. To promote administrative growth and increased value from service delivery improvements
4. To support vulnerable and marginalised populations within communities
5. To apply dedicated funding and resources to facilitate upskilling of all personnel
