STUDENT COMPILATION

STEPS 2023

SHOWCASING BEST PRACTICES

Students of Vance River R.C. Primary School Standard 5S were all afforded the opportunity to get involved in the learning of CORE Subjects and On Demand Learning through the Ministry's STEPS 2023 Program.

Students were encouraged to record their activities.

Please find samples of student activities in this presentation.

WHAT IS GAYAP

GAYAP - working together to get a task completed

Some tasks are:

- clearing land
- building a structure
- planting or reaping

In return, the families would provide food and drink with music and drumming.

G - get together

A - as one in

Y - youth with old

A - and

Creating 3D Models

image in Geography is a flat image. A map is a geographical are 2D images. esentation of the earth's features on flat sheet of paper.

A 3D image provides greater detail than a 2D image by adding height.

What are landforms?

Landforms are defined as the natural physical features found on the surface of the earth. These were created as a result of various forces of nature such as: wind, water, ice and movement of tectonic plates. Some landforms are created in a matter of few hours, while others take millions of years. Some of these natural physical feature include: mountain ranges, hills, valleys, plains, peninculas, swamps and rivers.

TECHNOLOGY EDUCATION

TOPPINGS
IDEATE

Problem: Ice cream shops use foreign based products for toppings which cause inflation in topping prices.

We have to create toppings from local resources to help combat the increase in price as well as to appreciate and diversify the uses of local products.

Students conducted a survey and presented findings on tally and bar charts.

Based on interpretation of data each group created toppings to suit the wants of the customers.

Then we conducted a test with classmates and teachers to determine the success in taste and want of toppings.

This proved FRUITFUL!
